

Shopify Daily Toolkit – Product Brief for Kimi

Project Vision

Create a lightweight Shopify app that combines several essential merchant tools inside one app. The goal is to help merchants replace multiple separate apps with one affordable, simple toolkit.

Core Principle

Keep the app as minimal as possible aesthetically, including only necessary customization options in settings. The interface should feel clean, fast, and practical.

Main Problems This App Solves

- Merchants pay for too many separate apps.
- Multiple apps slow stores and create clutter.
- Small merchants need quick tools without technical setup.
- Many stores need better conversion tools but want low monthly cost.
- Merchants waste time switching between apps for simple tasks.

Target Users

- Small and medium Shopify stores
- New brands launching quickly
- Budget-conscious merchants
- Merchants wanting easy setup and daily utility tools

App Experience

After installation, merchants see a dashboard with simple tool cards. Each tool can be enabled or disabled. Every tool should have only essential settings. Changes should be easy and fast.

Included Tools (MVP)

1. Offer Bar

A top announcement bar for offers like free shipping or limited sales.

Solves: Poor visibility of promotions.

2. Countdown Timer

Creates urgency for product launches or sales campaigns.

Solves: Low conversion due to lack of urgency.

3. Popup Builder

Discount popups, email capture popups, exit-intent popups.

Solves: Lost visitors and missed lead capture.

4. Trust Badges

Badges like Secure Payment, Cash on Delivery, Easy Returns.

Solves: Low trust and hesitation at checkout.

5. Product Bundle Offers

Lets merchants group products together and encourage larger orders.

Solves: Low average order value.

6. Sticky Add to Cart

Persistent add-to-cart bar, especially useful on mobile.

Solves: Missed purchases while scrolling.

7. Bulk Product Editor

Lets merchants update prices, tags, compare prices, or status for many products at once.

Solves: Time wasted editing products one by one.

8. Review Widget

Simple product reviews with stars, text, and optional images.

Solves: Weak social proof and low trust.

Design Direction

- Minimal and clean dashboard
- Fast loading

- No unnecessary animations
- Clear toggles and save buttons
- Mobile-friendly admin experience
- Settings should be short and practical

Pricing Suggestion

Free Plan: Limited tools

Starter Plan: All tools

Growth Plan: Premium extras later

Future Expansion (Later Only)

- AI product copy tools
- WhatsApp marketing
- Theme sections
- CRO recommendations
- Email automation

Success Goal

Merchants should feel they can uninstall several apps and use this single toolkit instead.
